What have you been up to in the last 40 years?

I have been working for AT&T in the IT Department as a Technical Director responsible for the software development and maintenance of Service Order Processing systems in our Midwest and South East regions. I officially retired from AT&T in 2007 but I went back to work for them the very next day as a consultant doing the exact same job. Besides work I have been active in our church in Waterford, serving on various boards and other committees. I enjoy golfing, boating, traveling, and working around the house.

Thoughts: Who are you? What is most important to you now?

I'm looking forward to real retirement in the next year or so. I have been truly blessed with a wonderful family and enjoy spending as much time with all of them as possible.
