

Tom Ruff

I don't have much info for the class book thing since I'm still single and spent most of the time working at Universal Engineering (later Tooling Systems Division) here in Frankenmuth for 30 years. I did manage to take my father and friends over to " The Listening Room " every now and then to spend some of the money we made working all that overtime ! I've been kinda semi retired since TSD went out of business but still busy with house repairs and my newer hobby of helping everybody keep their computers working. I still watch movies on my self installed Home Theater system (I mentioned that I still need help to finish it and bring it up to date equipment wise) ...hint..hint..hint. Anyway..thanks for calling and the email and you can always call me if you need any info....Thanks again Tom Ruff (989) 652- 2070
